# Contract Specifications

|                           |   |
|---------------------------|---|
| Unit of Trading           | 1,000 metric tonnes of thermal coal   |
| Contract Size             | 1,000 metric tonnes per contract month  |
| Minimum Trading Size      | 1 lot = 1,000 metric tonnes   |
| Minimum Block Order       | 5 lots = 5,000 metric tonnes  |
| Quotation                 | The contract price is in US Dollars and in US Dollar Cents per tonne  |
| Minimum Price Fluctuation | 5 Dollar Cents per tonne  |
| Tick Value                | Contract Size x Minimum Trade Size x Minimum Price Flux   |
| Maximum Price Fluctuation | There are no limits.  |
| Settlement Price          | The weighted average price of trades during a ten-minute settlement period from 16:05 to 16:15, London Local Time. If there is low liquidity during this time, Quoted Settlement Prices (QSPs) will be used to establish the settlement price.  |
| Position Limit            | Positions are reported to the Exchange on a daily basis. The Exchange has powers to prevent the development of excessive positions or unwarranted speculation or any other undesirable situation and may take steps to resolve such situations including the ability to mandate members to limit the size of such positions or to reduce positions where appropriate.   |
| Initial Margin            | Calculated on all open contracts, initial margin is a deposit held by ICE Clear Europe in order to cover the costs that may be incurred in closing out a position in default. It is returned upon the closing of the position, or at expiry, with interest.   |
| Daily Margin              | All open contracts are 'marked-to-market' daily, with variation margin being called for as appropriate.   |
| Delivery/Settlement Terms | The ICE Newcastle Coal Futures Contract is cash-settled at an amount equal to the monthly average global COAL Newcastle Index. The full methodology for calculation of the index is available at <a href="http://www.globalcoal.com">www.globalcoal.com</a>   |
| Additional Information    | The globalCOAL Monthly Newcastle Index is the average of each Weekly Newcastle Index as calculated on each Friday falling in that calendar month. The Weekly Newcastle Index is the weighted average of two elements: (1) The weighted average price of transactions. (2) An average of bids and offers. The full methodology for calculation of the Index is available at <a href="http://globalCOAL">globalCOAL</a> . |
